LIPPER LEADERS RATING (OVERALL)

Total Return	Consistent Return	Preservation	Lipper Leaders Key
③	③	②	Lowest ① Highest ⑤

The Lipper Leaders Ratings System is a set of tools that guide investors and their advisors to select funds that suit individual investment styles and goals. It uses investors-centred criteria to deliver a simple, clear description of a fund's success in meeting certain goals, such as preserving capital or building wealth through consistent strong returns.

Lipper Leader ratings are derived from highly sophisticated formulas that analyse funds against clearly defined criteria. Each fund is ranked against its peers based on the metric used (such as Total Return or Expense), and then the top 20% of funds in that ranking receive the Lipper Leader designation. Lipper Leaders measures are not predictive of future performance, but they do provide context and perspective for making knowledgeable fund investment decisions.

FUND MANAGER'S COMMENTARY

The Fund declined by 0.76% in Apr 2024, underperformed the benchmark by 2%. The underperformance was due to the relative underweight exposure in Hong Kong and China markets as well as drag for selected exposure to the Asean countries.

In April, the MSCI Asia Pacific ex Japan (MXAPJ) index posted a positive return of 0.33% (USD terms). Both Hong Kong and China markets outperformed following improved sentiment on the back of China's capital market guideline 3.0 which aimed to improve investor returns and the anticipation of more property easing during the month end politburo meeting. During the month, expectations for the US Federal Funds Rate (FFR) shifted to "higher-for-longer" stance after the US March inflation data surpassed predictions and robust job data suggested sustained purchasing power. This led market to price in just over one Fed rate cut for 2024 from as high as seven in late Dec 23/ early Jan 24. Geopolitical tensions in the Middle East intensified market concerns that resulted in flight to safe-haven assets such as the US\$ and UST where the Dollar Spot Index appreciated by 1.7% mom and UST 10-year yields moved higher by 48bps which was the largest since Sep 22.

IMPORTANT INFORMATION

Based on the Fund's portfolio returns as at 30 April 2024, the Volatility Factor (VF) for this Fund is 14.6 and is classified as "Very High" (Source: Lipper). "Very High" generally includes funds with VF that are higher than 14.515. The VF means that there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision. The VF for the Fund may be higher or lower than the VC, depending on the market conditions. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.
